Old radial gate at Carpenters Road Lock in 2008.

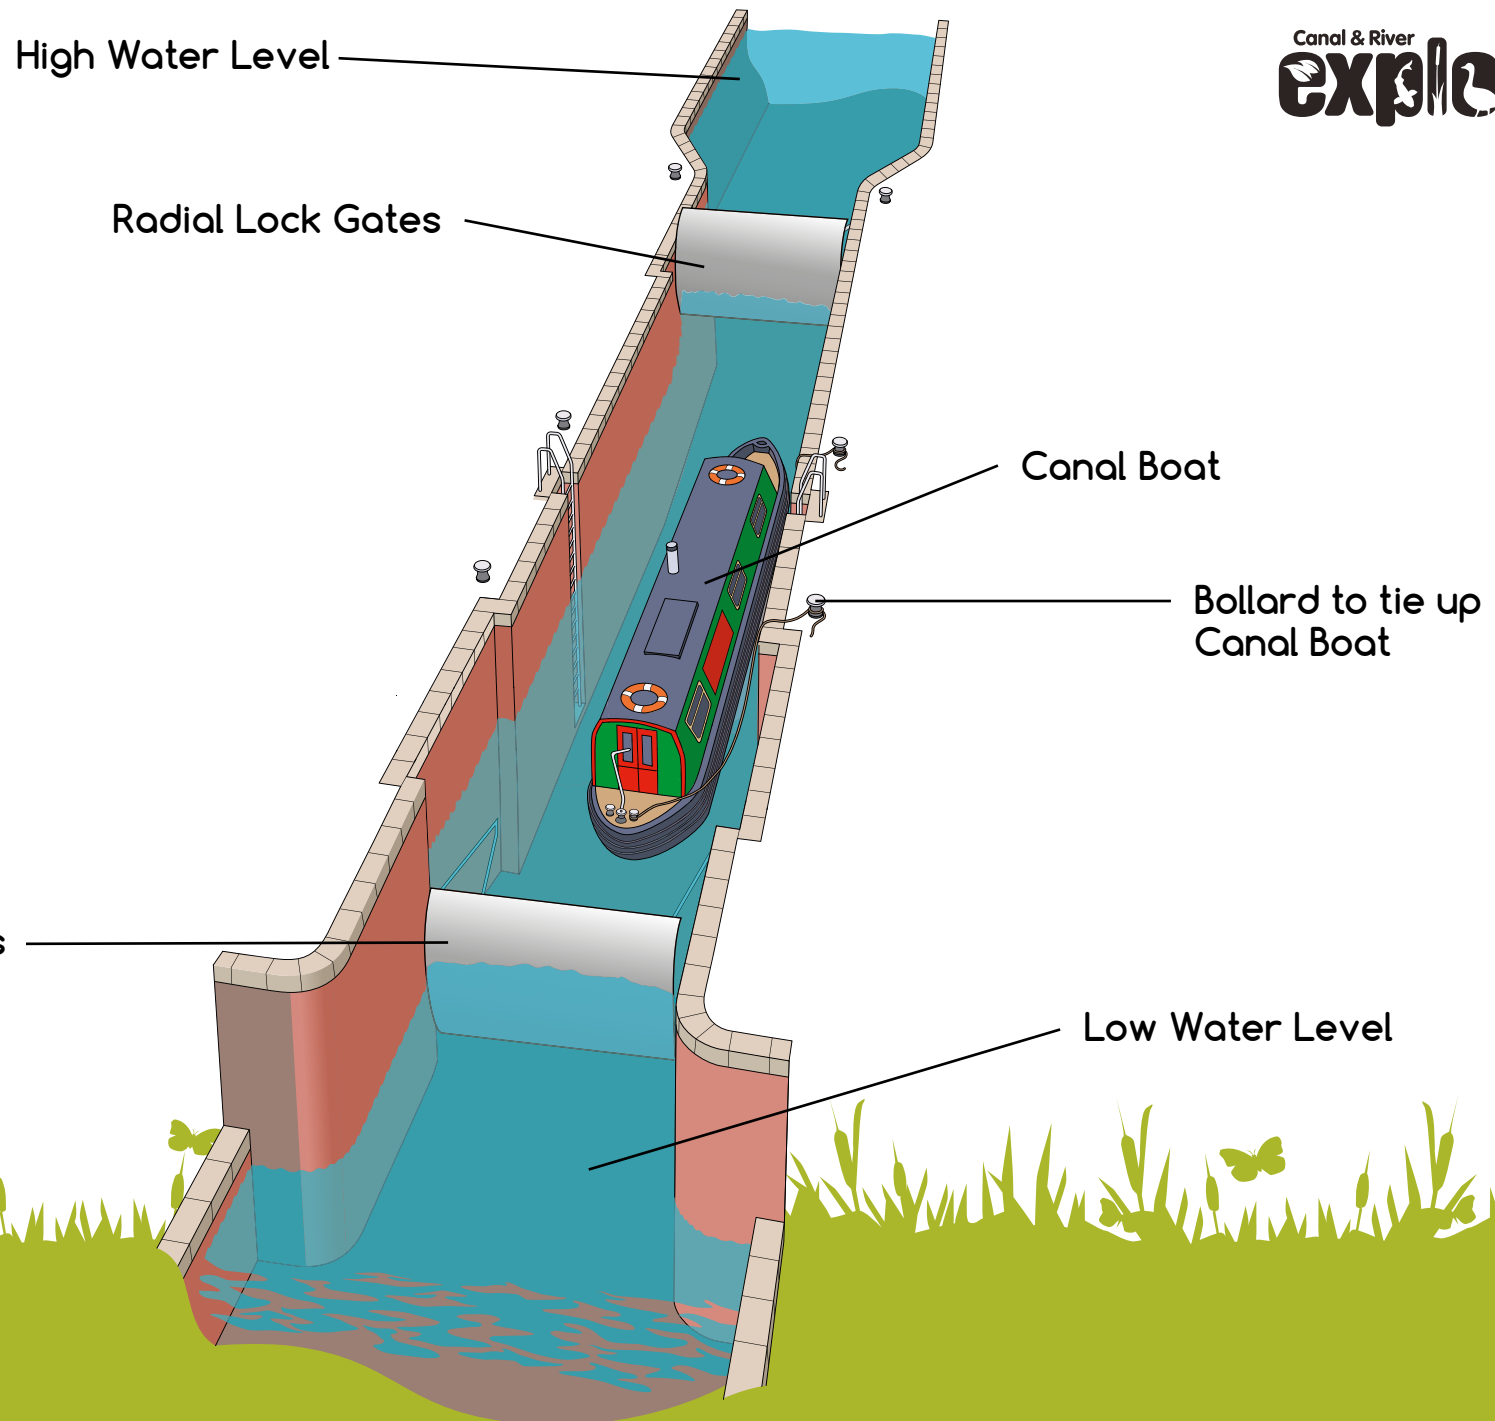

Inside Carpenters Road Lock in 2008.

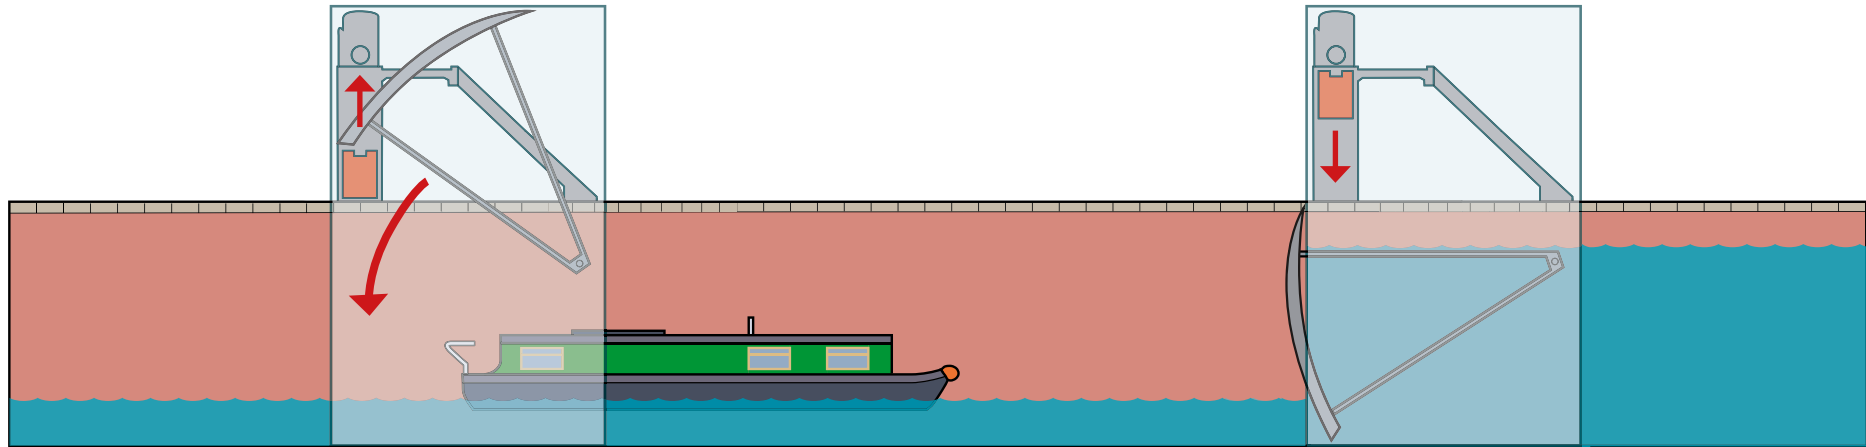

# Carpenters Road Lock

## How the Lock Works

# Boat enters the lock chamber

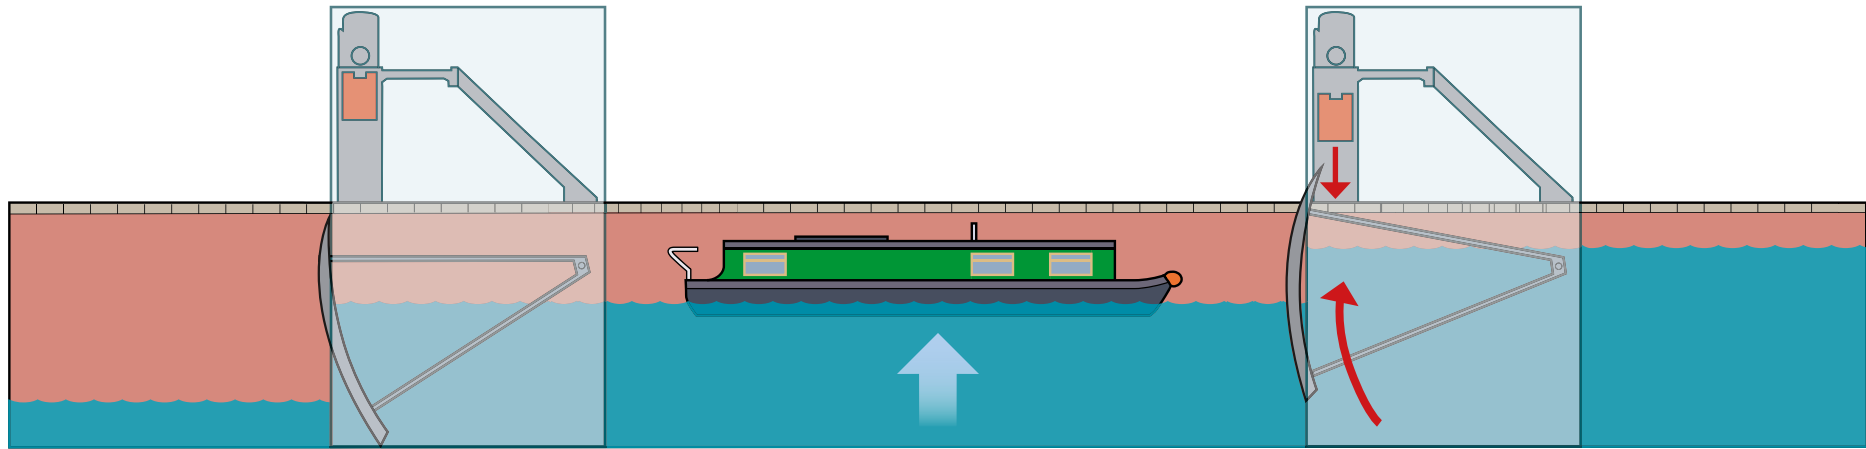

Did you know...  
that Carpenters Road  
Lock is the only lock in  
the country to have two  
radial lock gates

# Lock chamber fills with water

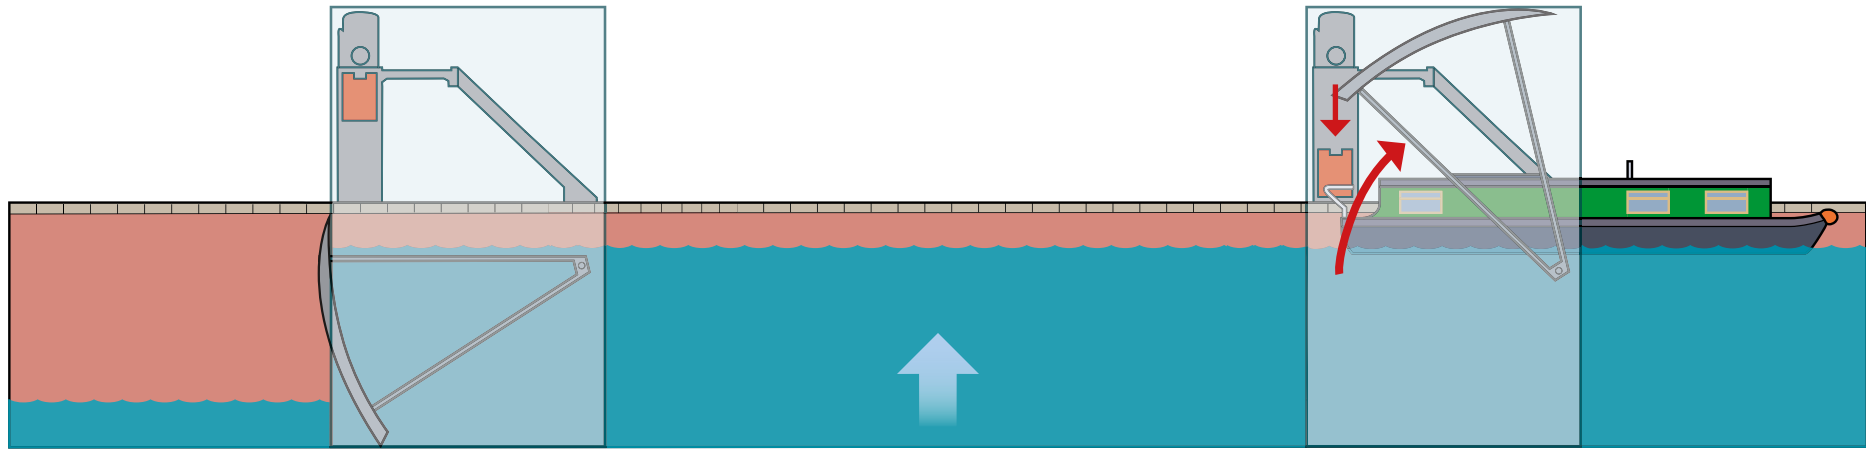

## Did you know...

that Carpenters Road Lock will play a role in flood prevention in the local area as the gates will be automated to enable flood water to be distributed to other channels within the river system.

# Boat leaves the lock chamber

## Did you know...

that the restoration project costs £1.75million and is partly funded by the Heritage Lottery fund, London Legacy Development Cooperation (LLDC), Inland Waterways Associations and the Canal & River Trust

# Carpenters Road Lock

## Restoring the Lock

Draining the lock, 2017.

Repairing the lock walls, 2017.

Replacing the radial gate pivot points, 2017.

Building the new radial gates in Sheffield, 2017.
